Our Objective

A special initiative by the name "**CAREER SAATHI**" is under taken to help children to handle pressure, stress of academics, adolescent problems, homesickness and depression.

A good number of students in India are not aware of the variety of career choices available to them. Because of this forced unfamiliarity, students fall prey to social pressure and take up one of the two dominant career choices: Engineering or Medicine. In many cases, students are not aware of what courses to study in order to gain the functional and theoretical experience for a particular job. However, parents are highly concerned about their child's career and are willing to sacrifice their personal well-being in order to provide quality education for their child.

"**CAREER SAATHI**" has established a Cell of teachers and experts for Career & Counselling of students. We are designing self-assessment tools to determine the strengths and areas of improvement for students, in addition to providing guidance and mentoring them.

It rests on the belief that an individual's intellectual and personal growth are both complementary and inextricably linked. It is this ethos that underpins the role of our Counsellor, where mutual respect and human potential are emphasized in every aspect of schooling.

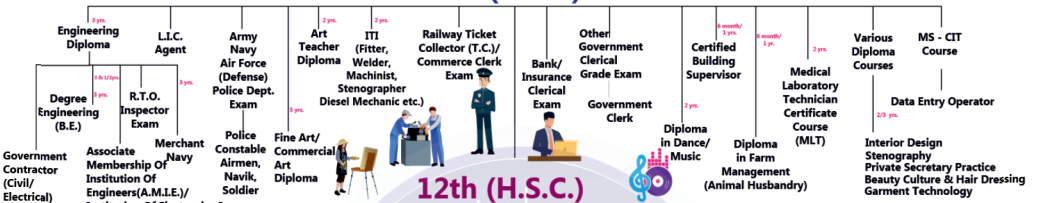

The Counselling team is an integral part of "**CAREER SAATHI**" and provides pro-active character development programmes for all individuals as well as social-emotional counselling. Our aim is to enhance and support the intellectual, social and emotional growth through a caring and balanced environment, as well as provide social-emotional counselling for learners who are experiencing difficulties in their lives.

The Counselling team also communicates, co-operates and collaborates with parents and other professionals to ensure that all learners have the opportunity to achieve school /COLLEGE success.
